Volunteer Corporate FCU Implements Viewpointe Pointe2Pointe Imaging Software

KNOXVILLE, Tenn. - Volunteer Corporate FCU has agreed to install Viewpointe's Pointe2Pointe with Internet connectivity service for check image exchange transfers.

The company said Pointe2Pointe provides a quick, cost-effective method of conducting image exchange for moderate volumes and eliminates the need for a dedicated telecom line. The service provides a safe, simple and secure platform to connect with other exchange partners by leveraging commonly used file transfer software.

Pointe2Pointe provides a platform for VolCorp to securely send and receive electronic check images, eliminating the time and expense that come with physical processing. The service helps credit unions move toward eliminating the financial and logistical burdens associated with processing paper-based checks.
