VolCorp Launches Merchant Capture Product

02/03/10

NASHVILLE – Volunteer Corporate Credit Union (VolCorp) recently completed successful beta testing of its merchant capture product with Collegedale Credit Union in Collegedale, TN. Branded *ezcapture*, the product is a web based remote deposit solution now available to member credit unions for use with their own business members. It is also available to smaller member credit unions as an affordable alternative to branch capture.

“I would like to extend my sincere appreciation for the high caliber of training both our member and I received from VolCorp,” Danilvy Turner, Operations Manager for Collegedale Credit Union, said. “We are very pleased with *ezcapture* and VolCorp’s support services. Their merchant capture product, *ezcapture*, is not only a breeze to implement, but user friendly. Since the application guides you through the process of submitting deposits, our member was able to learn it quickly. I would recommend *ezcapture* to others without reservation.”

Some features of *ezcapture* include the ability for credit unions to review and approve merchant deposits prior to transmission to VolCorp and the ability the set deposit limits per item, per deposit, and per daily total.

VolCorp is a not-for-profit financial cooperative that serves natural person credit unions nationally. We were organized for the express purpose of providing low-cost financial services and competitive investment and lending rates to our member/owners, and are guided by a volunteer board of directors.
